

Welcome to **VOLEX BATAM**

Your Tariff-Free Manufacturer in Southeast Asia

Volex Batam provides a competitive price advantage as a tariff-free manufacturing site for power cords, high-speed cable assemblies, electric vehicle charging solutions and medical cable assemblies.

Key Highlights

Exclusive High-Speed Data Center Cable Manufacturer

We are the sole provider of high-speed cable solutions for data centers in Southeast Asia, serving major hyper scalers globally. Our commitment to innovation and quality ensures that we meet and exceed the rigorous demands of the industry.

Power and Whip Cable Capabilities

Volex Batam specializes in producing power cords, custom power distribution units (PDUs) and power whip cable assemblies tailored to your specifications. With our experience in utilizing rewirable plugs, connectors and cables, we deliver reliable solutions that power your operations seamlessly.

Electric Vehicle Charging Solutions

Our facility is certified IATF 16949 for automotive standard quality processes to provide exceptional levels of traceability and quality assurance throughout the manufacturing process. Our expertise in the EV market and our global safety approvals mean we can be a trusted partner for manufacturers and OEMs.

Medical / Integrated Manufacturing Services (IMS)

Through our ISO 13485 certification, we specialize in quick turnaround, integrated manufacturing services, for highly complex and advanced products. Our engineering and manufacturing teams are well versed in the latest technologies and processes to help our customers with complete solutions for all kinds of medical manufacturing and assembly requirements.

Advantages of Choosing Volex Batam

- **Tariff-Free Solutions**

Our special economic zone status provides tariff-free solutions for our North American customers, streamlining your supply chain and enhancing cost-efficiency.
- **Proximity to the Port of Singapore**

Located just a 45-minute ferry ride away from the bustling Port of Singapore, our facility ensures efficient logistics and timely deliveries to meet your deadlines.
- **Comprehensive Manufacturing Capabilities**

From duty-free import and export materials, to a controlled clean room environment and in-house reliability and testing labs, we offer a one-stop solution for all of your high-speed cable manufacturing needs.
- **Expertise and Know-how**

With experienced management and staff, along with acquired know-how in making complicated cable assemblies, we guarantee superior quality and performance in every product we deliver.
- **Global Accessibility and Risk Diversification**

Our quick access to Singapore and various key countries, coupled with in-house PVC granules, wires, and cables, ensures resilience against tariff changes, lockdowns, supply chain disruptions, and freight constraints.

A Volex Centre of Excellence

At Volex Batam, we pride ourselves on being the largest manufacturing site within the Volex Group, boasting over 3,000 skilled employees dedicated to excellence. Situated strategically in Batam, Indonesia, our state-of-the-art facility offers unparalleled capabilities across all vertical markets.

A Vertically Integrated Facility

Our manufacturing process is characterized by precision and quality at every stage. From in-house PVC / HF resin compound production, to cable extrusion and plastic injection molding, we maintain strict standards to ensure product excellence. Rigorous factory testing and certification further validates the quality and safety of our solutions, providing you with peace of mind.
